

## INSTALLATION INSTRUCTIONS FOR RECESSED

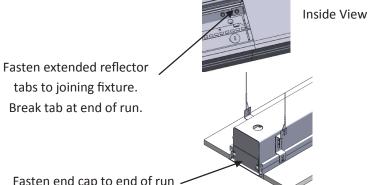

- 1. Remove lens.
- 2. Install hanger brackets on each side of fixture approximately 4" inches in from the ends. For 9/16" lay-in grid place smaller gap side of bracket towards lens. For other grids place wider gap side towards lens.
- 3. Set fixture into opening between Tee Grid. After the fixture is set, screw in #8 self threading screws in hanger bracket and attach support wiring to the building and fixtures.
- 4. Bring conduit and conduit fitting (supplied by others) to the power feed hole location at the end of the housing or in end cap.
- 5. Slide fixture together using sliders that ex-tend from fixtures to insure proper align-ment.
- 6. Screw internal reflectors down to joining fixture.
- 7. Grid end caps can be adjusted for lay in or Slot T configurations (use extra holes to adjust)

Smaller gap side of Bracket for 9/16" lay-in grid

Fasten end cap to end of run
