

Declaration of Compliance

Buy American

Buy American: Our main manufacturing facility is located in Fort Worth, Texas and we are proud to employ American workers and to supply projects all over the United States.

The parts we provide as components or subcomponents for products are manufactured in the United States, as our parts are manufactured or substantially transformed in the United States.

Different domestic content standards may be applied to materials regulated under different laws, such as the Build America, Buy America (BABA) Act, depending in part on how those materials are funded, delivered and/or used. We work to ensure compliance with these evolving standards, by establishing a compliance baseline, training, vetting personnel, management updates and reviews, taking input from our employees and suppliers, and coordinating closely with our customers.

If you would like further information on our products' "Buy American" status, please use the checklist below to let us know (1) for which of our products you would like to receive more information; (2) what legal requirements apply to the project for which our products will be used (often this is tied to how the project is funded, and is set forth in the master project solicitation); and (3) how our products will be delivered and integrated into the project (which is often relevant to compliance).

Buy America(n) (BAA) Build America, Buy America (BABA) PROJECT CHECKLIST

Many federally funded projects include provisions that require procurement of domestic products. These requirements typically apply to projects utilizing U.S. federal funds or grants but may also apply to state or municipal funded projects. The information below will be used by us to provide a certification letter that will help ensure that products provided by us meet the expectations of the general contractor and project inspector.

Customer:
