

CASE STUDY

Waupun Correctional Institution

Waupun, WI

QUICK FACTS

Strength

Holds up to high abuse with a heavy-duty, seam-welded design

Quality

Highest quality, cold-rolled steel and tamper-resistant center pin

Intelligent Design

Designed with maximum security construction & energy saving technology

PROJECT OVERVIEW

Challenge

Waupun Correctional Institution, built in 1851, wanted to update their lighting to more-efficient LEDs. As a maximum security facility, fixtures must withstand high abuse. Planning maintenance on a facility over 160 years old is no easy task.

Solution

Advantage engineered the BASWL, part of our Bastille series, to hold up to repeated abuse from full-throttle abuse from a baseball bat. We combined maximum security construction with energy-saving technology—tailored to meet unique client needs. Compliant with federal standards and ligature-resistant, it offers both utility savings and life-preserving performance.

Ideal for inmate cells, showers, psychiatric units, behavioral health, and more.

PRODUCT FEATURED

BASWL - Surface Mount LED

850 units installed on this project

Ligature-Resistant
