

# CASE STUDY

## NPS Plaza - Professional Building

Santa Clara, CA

## PROJECT OVERVIEW

### Challenge

NPS Plaza sought to upgrade their lighting with a visually uplifting solution. Their vision of a sky ceiling with recessed troffers was made possible with Advantage's LFE Series—high-efficiency LED flat panels offering customizable imagery, low maintenance, and long-term energy savings.

### Solution

Advantage provided NPS with custom 4x4 LFE flat panel LEDs to create a striking 12-foot illuminated feature. With a range of image options, the LFE combines aesthetic appeal with long-term energy efficiency. NPS chose a blue sky with Aspen trees and was thrilled with the result.

*"We absolutely love it! Our profound appreciation and thanks to you and everyone at AEL for the wonderful job," said Anthony Smrdeli, of NPS Properties.*

## QUICK FACTS

### Soothing Design

Transform your space with stunning artistic acrylic diffusers featuring blue skies, underwater scenes, or any custom imagery

### Quality

We use premium-grade acrylic for the diffusers and construct the fixture body from durable heavy-gauge cold-rolled or stainless steel.

### Eco-Friendly

Mercury-free, no UV/IR emissions, and energy-saving LED technology

## PRODUCT FEATURED

LFE - Flat Panel with Dynamic Images
